

Ingredient Summary:

What's in Our Cuticle Oils?

We know how important it is to understand what's going onto your nails, and your skin. Here's a simplified breakdown of the key ingredients used in our Cuticle Oils. It's a functional formula that softens and breaks down cuticle tissue using:

Key Ingredients & What They Do

Joboba Oil: A hero ingredient for nails and cuticles. Jojoba oil closely mimics your skin's natural oils, which means it absorbs easily without feeling greasy. It helps soften dry cuticles, improve flexibility, and support healthier-looking nail growth.

Vitamin E: A well-known antioxidant that helps protect the skin barrier. It supports moisture retention and can help reduce dryness and brittleness around the cuticle area.

Vitamin B (Panthenol): Often used in nail and hair care for its conditioning properties. It helps improve hydration, supports smoother cuticles, and contributes to stronger, more resilient nails over time.

Fruit Oils: Used for their soothing and conditioning properties. Flower oils help calm the skin and add a sensory, self-care element to your cuticle routine.

Seed Oils: Naturally rich in fatty acids, seed oils help lock in moisture and support the skin barrier around the nail area, reducing dryness and flaking.

Essential Oils: Used in low concentrations for fragrance and sensory experience. They give each cuticle oil its distinct scent while complementing the nourishing oil base.

What You Won't Find in Our Cuticle Oils

Mineral oil, Parabens, Phthalates, Drying alcohols

We keep the formula focused on oils that nourish, condition, and feel good to use, no unnecessary fillers or harsh additives.

Possible Reactions

Our cuticle oils are formulated to be gentle and suitable for regular use. However, as with any product containing essential oils and botanical ingredients:

- Those with very sensitive skin or fragrance sensitivities may experience mild irritation
- Reactions are uncommon but possible on compromised or broken skin

If irritation occurs, discontinue use and allow the skin to recover.

Safety First

- For external use only
- Avoid contact with eyes
- Do not apply to broken or inflamed skin
